

Table edge cases

GFM tables look simple but have several edge cases: ragged rows, alignment markers, escaped pipes, very wide and very narrow tables, and inline formatting in cells.

Minimal table

a	b
1	2

Wide table — 8 columns

col1	col2	col3	col4	col5	col6	col7	col8
a	b	c	d	e	f	g	h
1	2	3	4	5	6	7	8

Should fit on a letter page in a sensible width or wrap gracefully.

Alignments

Left	Centre	Right
L1	C1	R1
L2 long content	C2	R2 short
short L3	C3 longer	12345

The first column should be left-aligned, the second centred, the third right-aligned.

Ragged rows

a	b	c
1		3
1	2	
	2	
1	2	3

The last row should drop the extra cell; the shorter rows should pad with empty cells.

Inline formatting in cells

Style	Example
bold	value
italic	<i>value</i>
code	va lue
link	click
mixed	<i>bold italic</i> code

Escaped pipes inside cells

a	b c	d
1	with pipe	3

The \ | should render as a literal pipe character, not a column separator.

Very long content in one cell

short	long
hi	This cell has a paragraph of content that may overflow the column width depending on how the renderer balances columns. It might wrap, it might shrink the other column, or it might overflow.
